

Vox Ignis ViAC-ODP-SS “Assist Call” Over-Door Plate with Indication and Sounder

The over door plate is used to give an audible and visual warning as to which disabled WC requires assistance, it should be mounted either on the wall or ceiling above the door of the disabled WC. The over door plate is built in a single gang brushed stainless steel plate as standard with a blue halo indicator for the visual alarm and a buzzer for the audible alarm.

For simplicity all wiring is a standard two core cable, the wiring order of the plates is not fixed and therefore can be wired in any order to provide cable routing flexibility. Each plate has two sets of two-part terminals allowing simple cable connections and a complete first fix solution.

Key Features

- Single gang
- Injection moulded blue polycarbonate with stainless steel fascia
